

Cool Action Gel Memory Foam Features & Benefits

Cool Action Gel Memory Foam is a worldwide patented product which combines superior memory foam infused with MicroSupport gel beads. The features and benefits and key points of this product are below:

Open cell foam structure

- Increases airflow
- Allows the Cool Action Memory Foam to be up to 12 times more breathable than ordinary memory foam

Mineral based MicroSupport gel beads

- Conduct heat away from the body
- Actively support the body
- Creates such a high density that movement across the comfort layer is eliminated
- Gather in the areas of the body that need extra support

Hydrofast treated fabric

- Draws heat away from the sleeper reducing residual heat

Graduated adjustment

- Must allow 10-15 minutes to adjust to individual body shape

Cool Action Gel Memory Foam:

- Is cooler than ordinary memory foam
- Is uniquely designed to deliver lower average body pressure than other advanced comfort materials
- Has a density over 250% higher than standard bedding foam
